Preface

The XXI International Symposium on Lepton and Photon Interactions at High Energies marked the return of the Symposium to Fermilab at the start of the Run II collider era of the Tevatron. As of 11-16th August 2003, the Tevatron has delivered an integrated luminosity surpassing that of the previous collider run. Whereas the IX Symposium, held at Fermilab in 1979, marked the start of construction of what was then called the "Energy Saver/Doubler", this one saw the newest accelerator at Fermilab – the Main Injector – in full operation for both protons and antiprotons. With the Main Injector the instantaneous luminosity of the Tevatron collider is a factor ~ 50 higher than the original design luminosity presented in 1979 for the "Energy Saver/Doubler". Soon to join the presently running MiniBooNE experiment will be a new neutrino program at Fermilab powered by the intense proton beams provided by the Main Injector. This summer saw the completion of the MINOS far detector and the NUMI neutrino beamline will soon be completed.

At the IX Symposium the first evidence for gluons was shown and QCD emerged as the theory that could describe what was known about hadrons. It was hoped that QCD would soon be near to gaining the stature of QED. At this Symposium a major breakthrough was presented. Lattice QCD has reached a new level of precision, where errors on calculated quantities can at last be reliably quantified at the several % level. Soon, instead of testing Lattice QCD we will be using it to help us determine more precisely the parameters of the Standard Model and to look for New Physics. Other highlights for this Symposium included the vast amount of new data from the B-factories with the tantalizing possibility of non-Standard Model CP-violation in ϕK_S^0, and the discovery of a new, as yet unexplained, particle, the $X(3872)$. The remarkable progress in neutrino physics was again evident with the last pieces of the solar neutrino problem falling into place and settling on the LMA-1 solution. However we were reminded how much we still need to understand by the talks on Dark Matter and Dark Energy. The talks also showed the synergy between the different areas of particle physics and between particle physics, astroparticle physics and cosmology, especially in the search for New Physics at the TeV energy scale.

While still following the traditional program of review talks, for this edition of the Symposium a real effort was made to increase active participation throughout the Symposium. This was partly achieved by holding breakout discussion sessions between the formal plenary talks. There, the speakers from several sessions were available for an extended "Question and Answer" session. These new sessions were enormously successful, and the only regret maybe is that we do not have a written record of these discussions. However this probably allowed for a more informal and relaxed atmosphere. Additional participation was also generated by another new introduction to the Symposium, a "Physics Posters" session. There were 66 physics posters presented with obvious enthusiasm by young physicists. These poster presentations were split over two days and included results from 20 different experiments as well as posters on theory, analytical techniques, and detector development. A "Laboratory Posters" day was again held with the participation of 15 laboratories, based in eight different countries. In addition, one evening was devoted to a special session on the Computational Data GRID, comprising an interesting program with both talks and posters.

Another aim for this Symposium was to increase the participation of younger scientists, who are the future of the field. As well as having some excellent young speakers and holding the new "Physics Posters" session, younger scientists were recruited to help throughout the Symposium. Included in this were the local organizing committee, the Scientific Secretaries, and one of the editors can still be considered young!

A major effort at this Symposium was public outreach. Members of the press held special discussion sessions with scientists on various physics topics; there was also a special press conference with the Laboratory Directors. The outreach effort included interaction with the public during several hours in the Field Museum in Chicago, which was covered by the press. There were also excellent "Plain English" articles written on seven different particle physics and cosmology topics made available via the Symposium website. At a public lecture on the last evening

of the Symposium, Fermilab director, Mike Witherell, gave an inspiring talk on "New Questions about Matter, Space and Time" to a packed auditorium of the local public. Capping off these outreach efforts was the launch of Interactions.org, a multinational website designed as a central resource for communicators of particle physics.

Following the excellent efforts of LP2001 on keeping a good record of the Symposium, we have tried to provide as good a record as possible via the website and through a DVDROM included with the hardcopy of the proceedings. These will provide a lasting record of the live webcast streaming video for each talk, the talk slides, the writeups of each talk, the public lecture, and the physics and laboratory posters.

The synergy between different areas of particle physics and cosmology that was so evident at LP2003 can be viewed as a broad attack to dispel the veil at the TeV energy scale. This effort will continue to pull at this veil and foreshadows the bursting forth of New Physics that will overwhelm, delight, excite, and inspire us. We hope that LP2005 will bring us a glimpse of this future era.

Harry W. K. Cheung
and
Tracey S. Pratt
Proceedings Editors

Acknowledgments

It is a pleasure to acknowledge the many people who made Lepton-Photon 2003 such a success. Keith Ellis and Joel Butler deserve special mention. They worked with enthusiasm to get Lepton-Photon 2003 hosted at Fermilab and then continued as key members of the Local Organizing Committee. Keith, with the Scientific Program Committee which he chaired, arranged a varied and interesting program. Joel, with his Special Events Committee, organized a full program of extra events, including a special session on the Computational Data Grid.

We thank the excellent Local Organizing Committee who worked very hard on all aspects of the Symposium, including the poster sessions, website, public outreach and contributed paper submission. Thanks to the International Advisory Committee for contributing useful suggestions on the program. The Scientific Secretaries are gratefully acknowledged for their many activities, including classifying all the contributed papers, providing technical help to speakers, and for their support during the sessions.

We thank the many Symposium speakers for their hard work and effort in producing excellent and engrossing reviews, and especially those speakers (almost everyone) who wrote up their talks for these Proceedings. We also thank the session chairs, many of whom also served as moderators in the experimental "breakout sessions". Special thanks go to Harry Cheung and Tracey Pratt for editing these Proceedings and getting them out promptly.

We thank Fred Ullrich and his staff and helpers from the Fermilab Visual Media Services for taking care of the streaming video, both the live webcast and archived version available from the conference website, the talk and poster presentation details, and for capturing the Symposium with a set of splendid photographs. Our thanks go to Judy Jackson, head of the Fermilab Office of Public Affairs, for organizing an extensive program for the press and laboratory public affairs personnel. We are pleased to acknowledge the financial support of Cisco Systems, Hamamatsu and Sun Microsystems. We thank the Illinois State Board of Higher Education /Illinois Consortium for Accelerator Research for their generous support of the poster session.

We received excellent support from Fermilab Director Michael Witherell and from staff in every Fermilab Division and Section. We particularly acknowledge the outstanding work of the Fermilab Conference Office. Cynthia Sazama, head of the Conference Office and a veteran conference organizer, coordinated a vast number of details, with assistance from Suzanne Weber, Patti Poole, and Harry Ferguson. Elaine Phillips (Particle Physics Division Administrative Support) was also particularly helpful.

Finally, for support that made this Symposium possible, our thanks go to the International Union of Pure and Applied Physics, the U. S. Department of Energy, the National Science Foundation, the Universities Research Association, OIST-Okinawa, NASA and of course Fermilab. The Fermi National Accelerator Laboratory is operated by the Universities Research Association, Inc., under contract DE-AC02-76CHO3000 with the U. S. Department of Energy.

C. Newman-Holmes
Chair, Lepton-Photon 2003 Organizing Committee

Editors' Acknowledgments

We would like to thank Cathy Newman-Holmes, Chair of LP2003, for giving us the opportunity and full responsibility for producing these proceedings. We made a special effort to try to publish these proceedings in the shortest possible time and we would like to thank all authors for delivering their contributions in a timely manner, while maintaining high standards in content and format. Regrettably a few contributions were not received. We also thank all authors for letting us try to improve the style, format

and the consistency of the whole volume – especially the U. K. authors for letting us change from British to U. S. spelling in their writeups!

We wish to thank the following people for helping out with the production of these proceedings. Jim Shultz and Fred Ullrich for help producing the DVDROM; Cynthia Sazama and Suzanne Weber for help with logistics; the Scientific Secretaries for help with the Discussion sections for each paper; Pushpa Bhat for help getting laboratory poster files; Fred Ullrich for help selecting photos for the cover and endpapers; Keith Ellis, Andreas Kronfeld and Chris Quigg for help trying to get writeup contributions; and the production staff at World Scientific – Karen Yeo, Jimmy Low and Rajesh Babu for producing the cover and for help with various production issues. TSP gratefully acknowledges support from the U. K. Particle Physics and Astronomy Research Council in the form of a PPARC Postdoctoral Fellowship.

Photo Credits

Reidar Hahn and Deborah Guzman of the Fermilab Visual Media Services took all the photos contained in these proceedings (except for the ones mentioned below). Photos from the Symposium Banquet were provided by Doris Kim and the photos for the first "Behind the Scenes" page were supplied by Leticia Shaddix. The photo for the cover was captured by Fred Ullrich, and Reidar Hahn took the photos displayed on the front and back endpapers. We thank each of them for the use of these excellent photographs. All the Visual Media Services 2003 Lepton-Photon Symposium photos can be obtained from the Fermilab Visual Media Services online photo database: search for captions with "Lepton Photon" at `http://vmsfmp2.fnal.gov/v1/VMSSearch_Online.htm`.

Descriptions of Cover and Endpaper Photos

Cover: Broken Symmetry

The tri-span sculpture, called "Broken Symmetry", rises 50 feet above the road at Fermilab's Pine Street entrance. It exemplifies the notions of symmetry and symmetry-breaking that are so important in the physics of elementary particles. Although asymmetric from most angles, when viewed from directly above or below the apex, the structure appears perfectly symmetric. This 21 ton "gateway" was constructed in 1978 from the steel armor plates of the U. S. Navy aircraft carrier, Princeton, which was decommissioned in May, 1956. The steel from this and other surplus decommissioned U. S. Navy battleships is used at Fermilab for radiation shielding.

Front Endpaper: Aerial View of the Fermilab Accelerator Complex

The large ring on the left in the aerial view of the Fermilab accelerator complex indicates the location of the Main Injector, Fermilab's newest accelerator. The larger four mile ring on the right shows the location of the Tevatron. Robert Rathbun Wilson Hall, the "Highrise", is clearly visible in the center. This is named after Fermilab's founding director.

Back Endpaper: View over Prairie, of Wilson Hall and Lederman Science Center

A look over an open tallgrass prairie which is part of Fermilab's Prairie Reconstruction Project. This is an effort to recreate some of the awesome beauty of the old prairies, as well as the biodiversity of native grassland ecosystems. Wilson Hall can be seen in the background on the right, and on the left is the Lederman Science Center, named after Nobel Laureate and former Fermilab Director, Leon M. Lederman. This visitor center is very popular with the public and surrounding schools for gaining hands-on experience to explore how Fermilab physicists understand nature's secrets.

WELCOME

WELCOMING REMARKS TO LEPTON PHOTON 2003 THE 21st INTERNATIONAL SYMPOSIUM ON LEPTON AND PHOTON INTERACTIONS AT HIGH ENERGIES

S. PETER ROSEN
Office of Science, U. S. Department of Energy
E-mail: Peter.Rosen@science.doe.gov

Ladies and Gentlemen, on behalf of the United States Department of Energy, Secretary Spencer Abraham and Director of the Office of Science, Raymond L. Orbach, it is my pleasure to welcome you to Fermilab and to Lepton-Photon 2003. Minasama, Fermilab narabini Lepton-Photon 2003 he Youkoso irassyaimashita. Meine Damen und Herren, willkommen zum Nationalen Fermi-Beschleuniger-Forschungszentrum. Mesdames et Messieurs, bienvenue au Laboratoire National d'Accélératures de Fermi. Signore e Signori, benvenuti al Laboratorio Nazionale Fermilab. Дамы и Господа, добро пожаловать в Fermilab. Damas y Caballeros, bienvenidos al Laboratorio Nacional Fermilab. Please forgive me if I have omitted your own language, but you are equally welcome.

I like to think of Fermilab as the home of the third family of quarks and leptons: the b quark was discovered here, and the first observations of the top quark and tau neutrino were made here. It is also the home of the Tevatron, presently the world's highest energy hadron collider and it will remain so until the LHC comes on-line in 2007. We all look forward to the first results from Run II to be presented at this meeting, and to the exciting physics it will produce in the next five years. The discoveries made here and the lessons learned about extracting physics from hadronic collisions at the current energy frontier will lay the groundwork for exciting and successful hadronic collision programs at the future energy frontier at the LHC. They may also provide hints about the physics we may encounter at a future linear electron-positron collider.

While allowing for the precautions which the United States Government believes to be necessary for security reasons, the spirit of Fermilab, like the spirits of its sister laboratories at Brookhaven and Stanford, and at high energy physics laboratories in Asia and Europe, is that of an international research center. You can see outside the main entrance to Wilson Hall the flags of all the nations from which physicists come to perform their experiments. About one half of the 1100 or so users at Fermilab are from foreign countries, and the same is true of the users at RHIC and at SLAC. We welcome this participation by our colleagues from abroad, just as we appreciate the welcome given to U. S. scientists at facilities in other parts of the world.

This international, or rather global nature of our field has grown strong roots in the world high energy physics community and it serves as a model for other scientific fields, especially those that require large, global-scale facilities. The high energy community has been a pioneer in the development of major facilities, for example super-scale detectors like CMS and ATLAS. The next steps that I believe it needs to pioneer are planning on a global scale, and the formation of a laboratory for the next frontier facility, which has to be global from its inception, through construction and into its operating phase.

Turning to the physics at this meeting, we look forward to the results to be extracted from the wealth of data accumulated by the B-factories at KEK and SLAC, something like 100 inverse femtobarns apiece. Will they reveal new sources of CP-violation beyond the Standard Model, or give hints of other new physics through precision measurements of exclusive decay modes? Neutrino physics has been extremely exciting in the past five years: what new insights will we learn about the number of neutrinos, the masses and mixing angles? What hints will we hear from the Tevatron about Supersymmetry and extra dimensions? Will new light shine on Dark Matter and Dark Energy? Obviously there is an abundance of exciting questions which will make for an exciting conference, and so with no more ado, I bid you welcome and good *physicking*!

FUTURE DIRECTIONS

Symposium Program

Monday 11th August 2003

OPENING REMARKS

8:30am Welcome
Michael Witherell, Director of Fermi National Accelerator Laboratory

8:35am Welcome
S. Peter Rosen, Office of Science, U. S. Department of Energy

Session 1 - COLLIDER AND ELECTROWEAK

Session Chair: Richard Keeler, Victoria

8:45am Top Quark Measurements at the Tevatron
Patrizia Azzi, Padova

9:20am Electroweak Measurements at the Tevatron
Terry Wyatt, University of Manchester

9:55am Precision Electroweak Physics from Low to High Energies
Paolo Gambino, CERN

Session 2 - COLLIDER SEARCHES

Session Chair: Rohini Godbole, Bangalore

11:00am Higgs and Supersymmetry
Michael Schmitt, Northwestern University

11:35am Exotic Searches at Colliders
Emmanuelle Perez, Saclay

12:10pm Theoretical Predictions for Collider Searches
Gian Giudice, CERN

Session 3 - QCD AND LATTICE

Session Chair: Dong-Sheng Du, Beijing, IHEP

2:15pm QCD Theoretical Developments
Thomas Gehrmann, Zurich

2:50pm Hard QCD at Colliders
Robert Hirosky, Virginia

3:25pm Lattice Gauge Theory
Peter Lepage, Cornell

Session 4 - RARE B AND K DECAYS

Session Chair: Robert Tschirhart, FNAL

4:30pm Rare Kaon Decay Physics
Augusto Ceccucci, CERN

5:15pm Beyond the Standard Model Sensitivity in K and B Physics
Yuval Grossman, Technion

Monday 11th August 2003

6:00pm Reception, Physics Poster Session, Jazz by Chicago Hot Six
8:00pm Special Session: Young Particle Physicists Town Meeting

Tuesday 12th August 2003

Session 5 - WEAK MIXING PHASES

Session Chair: Ikaros Bigi, Notre Dame

8:45am CKM Phases ($\boldsymbol{\beta/\phi_1}$)
Tom Browder, Hawaii
9:20am CKM Phases ($\boldsymbol{\alpha, \gamma/\phi_2, \phi_3}$)
Hassan Jawahery, Maryland
9:55am Mixings, Lifetimes, Spectroscopy and Production of B-quarks
Kevin Pitts, Illinois

Session 6 - CKM MAGNITUDES AND QCD OF HEAVY HADRON DECAYS

Session Chair: Michael Danilov, ITEP

11:00am CKM Matrix Element Magnitudes
Klaus Schubert, Dresden
11:45am QCD and Heavy Hadron Decays
Gerhard Buchalla, Munich

1:00–2:00pm **Informal Breakout Session I** Session 1 and 2 Moderator: Rohini Godbole, Bangalore
Session 3 Moderator: Kirill Melnikov, Hawaii

Session 7 - RARE DECAYS AND PENGUINS

Session Chair: Marina Artuso, Syracuse

2:15pm Rare Hadronic B Decays
John Fry, University of Liverpool
3:05pm Radiative and Electroweak Rare B Decays
Mikihiko Nakao, KEK

Session 8 - CHARM AND QUARKONIUM PHYSICS

Session Chair: Steve Olsen, Hawaii

4:30pm Experimental Limits on New Physics from Charm Decay
Bruce Yabsley, Virginia Tech
5:05pm Heavy Quarkonium, Production and Spectroscopy
Tomasz Skwarnicki, Syracuse
5:40pm Lessons from Standard Charm Decays
Jussara de Miranda, CBPF

Wednesday 13th August 2003 Free Day

6:30pm Reception, Crystal Garden, Navy Pier
7:30pm Banquet, Crystal Garden, Navy Pier

Thursday 14th August 2003

Session 9 - ASTROPARTICLE PHYSICS

Session Chair: Roberto Peccei, UCLA

8:45am Cosmic Microwave Background Experiments
Licia Verde, Princeton

9:20am Dark Matter and Energy
Robert Kirshner, Harvard

9:55am Astroparticle Theory
Esteban Roulet, Bariloche

Session 10 - NEUTRINO PHYSICS I

Session Chair: Stanley Wojcicki, Stanford

11:00am Dark Matter Experiments
Maryvonne de Jesus, Lyon

11:35am Double-Beta Decay and Tritium Decay Experiments
Giorgio Gratta, Stanford

12:10pm Results and Status of Current Accelerator Neutrino Experiments
Koichiro Nishikawa, Kyoto

1:00–2:00pm **Informal Breakout Session II** Session 4, 5, 6, 7 and 8 Moderator: Fred Gilman, CMU
Session 9 Moderator: Roberto Peccei, UCLA

Session 11 - NEUTRINO PHYSICS II

Session Chair: William Louis, LANL

2:15pm Reactor Neutrino Experiments
Kunio Inoue, Tohoku

3:00pm Solar Neutrino Experiments
Alain Bellerive, Carleton

Session 12 - NEUTRINO PHYSICS III

Session Chair: Enrique Fernandez, Barcelona

4:30pm Neutrino Physics: Open Theoretical Questions
Alexei Smirnov, Moscow and ICTP

5:15pm Future Experiments with Neutrino Superbeams, Betabeams and Factories
Deborah Harris, FNAL

Special Session - EXTREME COMPUTING: THE DATA GRID AND THE FUTURE OF DISTRIBUTED COMPUTING

Session Chairs: Vicky White and Ruth Pordes, FNAL

7:30pm Introduction and Overview of the Grid: Current Status of U. S. Grid R&D and Deployment
Ian Foster, Argonne and Chicago

8:00pm Grids in Europe and the LCG Project
Ian Bird, CERN, LCG

8:30pm Network Research Infrastructures: Back to the Future
Bob Aiken, Cisco

Thursday 14th August 2003

8:50pm Break
9:05pm All Grid, All the Time
Stephen Perrenod, SUN
9:25pm Grid Services and Web Services: Harmonic Convergence
David Martin, IBM
9:45pm TeraGrid and High-End Computing: Lessons and Futures
Daniel Reed, UIUC, NCSA, TeraGrid

Friday 15th August 2003

Session 13 - HADRON STRUCTURE I

Session Chair: Albrecht Wagner, DESY

8:45am Deep Inelastic Scattering
Paul Newman, University of Birmingham
9:20am Parton Distribution Function
Robert Thorne, Cambridge University
9:55am Measurements with Polarized Hadrons
Toshi-Aki Shibata, Tokyp Inst. Tech.

Session 14 - HADRON STRUCTURE II AND DETECTOR R&D

Session Chair: Halina Abramowicz, Tel Aviv

11:00am Diffraction and Vector Meson Production
Yuji Yamazaki, KEK
11:35am Heavy-Ion Collisions
David Hardtke, LBNL
12:10pm Detector R&D
Ties Behnke, DESY

Laboratory Poster Session/Fermilab Tours

1:30–4:30pm Fermilab Tours
2:15–6:00pm Lab Poster session

2:00–3:00pm **Informal Breakout Session III** Session 10, 11 and 12 Moderator: William Louis, LANL
Session 13 and 14 Moderator: Halina Abramowicz, Tel Aviv
3:00–4:00pm Detector R&D Moderator: Robert Kephart, FNAL

8:00pm Public lecture, "Windows on the Universe: New Questions about Matter, Space and Time"
Michael Witherell, FNAL

Saturday 16th August 2003

Session 15 - NEW ACCELERATORS

Session Chair: David Miller, UC, London

8:45am Report from the Young Physicists
Veronique Boisvert, CERN

9:00am LHC
Luciano Maiani, CERN

9:35am Physics of the Linear Collider
Francois Richard, Orsay

10:10am Report from the Chair of ICFA
Jonathan Dorfan, ICFA and SLAC

10:25am Report from the Chair of C11
Vera Luth, IUPAP-C11

Session 16 - FUTURE DIRECTIONS

Session Chair: Hirotaka Sugawara, KEK

11:00am Linear Collider Options: Status of the R&D and Plans for Technology Selection
Maury Tigner, ILCSC and Cornell

11:45am Supersymmetry and Other Scenarios
Edward Witten, IAS-Princeton

Session 17 - OUTLOOK

Session Chair: Cathy Newman-Holmes, FNAL

2:00pm Outlook: The Next Twenty Years
Hitoshi Murayama, UC, Berkeley

Physics Posters

Armstrong, Stephen *CERN*	The Physics Selection Strategy of the ATLAS High Level Trigger
Bachacou, Henri *University of California, Berkeley*	Measurement of the $t\bar{t}$ Production Cross Section at the Tevatron CDF Experiment using b-tagging
Black, Kevin *Boston University*	Design of the Silicon Track Trigger at D0
Bocian, Dariusz *Institute of Nuclear Physics, Cracow*	Luminosity Measurement with the Two-photon $pp \to pp + e^+e^-$ Process
Boisvert, Veronique *CERN*	Study of the q^2-dependence of $B \to \pi\ell\nu$ and $B \to \rho(\omega)\ell\nu$ Decays and Extraction of V_{ub}
Brubaker, Erik *University of California Berkeley*	Measurement of the Mass of the Top Quark at CDF using b-tagging in the Lepton + Jets Channel
Canelli, Florencia *and* Estrada, Juan *University of Rochester*	Optimal use of Information to Measure Top Properties
Chou, Aaron *Fermi National Accelerator Laboratory*	A New Algorithm for Computing the Aperture of the Auger Surface Detector
Coca, Mircea *University of Rochester*	Run II CDF Results in the $t\bar{t}$ Dilepton Channel
Del Re, Daniele *University of California, San Diego*	Measurements of Semileptonic B Decays with BABAR
Deryuzhkova, Oksana *Gomel State University*	Low-energy Electromagnetic Characteristics of π-mesons in the Covariant Lagrangian Approach
Dorjkhaidav, Orlokh *Syracuse University*	The BTeV Ring Imaging Cherenkov Detector
Erbacher, Robin *and* Thomson, Evelyn *FNAL* *Ohio State Univ.*	Kinematic Top Cross Section Measurement
Fang, Hung-Chung *University of California, Berkeley*	Study of Hadronic Moments in Semileptonic B Decays
Farbin, Amir *University of Maryland*	Measurements of Time dependent CP-asymmetries in Charmless Two-body B Meson Decays
Farrington, Sinéad M. *University of Glasgow*	Measurement of the B_s Lifetime from Semileptonic Decays: $B_s \to D_s\ell\nu X$
Feligioni, Lorenzo *and* Beauceron, Stephanie *Boston Univ.* *FNAL*	$Wb\bar{b}$ Production at the D0 Experiment
Formaggio, Joseph *University of Washington*	MOON: A Next Generation Double Beta Decay and Solar Neutrino Experiment
Fu, Shaohua *Columbia University*	Search for First Generation Leptoquarks in the Dielectron + Dijet Channel with the D0 Detector
Gao, Mingcheng *Columbia University*	Direct Search for Extra Neutral Gauge Bosons in the Dielectron Channel with the D0 Detector

Gerberich, Heather ..... Study of Dielectron + Photon Production at CDF in Run II
Duke University

Goldschmidt, Nathan ..... Measurement of the Helicity of W Bosons from Top Quark Decays at CDF
University of Michigan

Golling, Tobias ..... Measurement of the $t\bar{t}$ Production Cross Section Using Lifetime b-tagging with the D0 Detector
University of Bonn

Gomez-Ceballos, Guillelmo ..... W-pair Production Cross Section and W-branching Ratios at DELPHI
Massachusetts Institute of Technology

Groysman, Yuriy ..... Charmless B Decays
Lawrence Berkeley National Lab.

Hara, Koji ..... Time-dependent Analysis of B Decays at Belle
Osaka University

Hayward, Helen ..... Measurement of $Z + \gamma$ Production at CDF
University of Liverpool

Heeger, Karsten M. ..... Measuring θ_{13} in a Reactor Neutrino Oscillation Experiment
Lawrence Berkeley National Lab.

Howcroft, Caius ..... Atmospheric Neutrinos at MINOS
Cambridge University

Iijima, Toru ..... Development of New Particle Identication Devices for Future B-factory Experiments
Nagoya University

Ikado, Koji ..... High Mass Dilepton Pairs in the CDF Run II Data
Waseda University

Kim, Doris ..... Recent Semileptonic Physics Results from the FOCUS/E831 Experiment
University of Illinois

Kulasiri, Ratnappuli ..... Search for $B \to D_s^* + h$ Decays with the Belle Detector
University of Cincinnati

Legendre, Marie ..... Study of CP-asymmetries in BABAR with Partial Reconstruction of $B^0 \to D^{*-}\pi^+$
CEA, Saclay

Li, Selina ..... Studies of the $D_{sJ}^*(2317)$ and Observation of the $D_{sJ}^*(2463)$ at CLEO
University of Minnesota

Libby, James ..... Measurements of Rare Flavor Changing Neutral Current B Decays
Stanford Linear Accelerator Center

Maravin, Yurii ..... Measurements of the W and Z Production Cross Sections at D0 using the Muon Decay Channels
Fermi National Accelerator Laboratory

Messina, Andrea ..... Studies of W + jets Events in Run II at CDF
University of Rome, La Sapienza

Mohr, Brian ..... Study of the Performance of the CMS Endcap Muon Trigger
University of California, Los Angeles

Mulhearn, Michael ..... A Direct Search for Dirac Magnetic Monopoles at CDF
Massachusetts Institute of Technology

Nadolsky, Pavel ..... Nonperturbative Contributions in Tranverse Momentum Resummation
Southern Methodist University

Niebuhr, Carsten ..... H1 Upgrades for High Luminosity HERA Running
DESY, Hamburg

Ootani, Wataru ..... MEG Experiment: A New Experiment to Search for $\mu \to e\gamma$ at PSI
ICEPP, University of Tokyo

Orejudos, William ..... Run 2 Search for Long-lived Massive Charged Particles at CDF
Lawrence Berkeley National Lab.

Pascoli, Silvia ..... On the Connection Between Low-energy Leptonic CP-violation and Leptogenesis
University of California, Los Angeles

Perez Martinez, Aurora ..... Quantum Instability of Magnetized Stellar Objects
ICIMAF, Havana

Petyt, David ..... Test-beam Measurements with the MINOS Calibration Detector
University of Minnesota

Pitzl, Daniel ..... Hera-III
DESY, Hamburg

Ray, Heather ..... B-jet Tagging Efficiency in Run II at CDF
University of Michigan

Recksiegel, Stefan *and* Sumino, Yukinari .. Fine and Hyperfine Splittings of Charmonium and Bottomonium: An Improved Perturbative QCD Approach
Tech. U. of Munich *Tohoku Univ.*

Rodriguez Lopez, Jairo Alexis ..... Bounds on Charged Higgs Boson in the 2HDM Type III
Universidad Nacional de Colombia

Rott, Carsten ..... Searches for the Supersymmetric Partner of the Bottom Quark using the CDF Detector at the Tevatron
Purdue University

South, David ..... Physics Results from H1
DESY, Hamburg

Strang, Michael ..... The Forward Proton Detector at D0
University of Texas, Arlington

Tanimoto, Naho ..... Measurement of $W + \gamma$ Production at CDF
Okayama University

Tonelli, Diego ..... Branching Fractions and Direct CP-violation in the $B \to h^+h'^-$ Decays at CDF II
INFN, Pisa

Treccani, Michele ..... Higher Order Radiative Correction to Drell-Yan Processes at Hadron Colliders
University of Pavia

Wang, Gensheng ..... Dark Matter Search with the CDMS Experiment
Case Western Reserve University

Wilson, Michael ..... The $D_s(2317)$, $D_s(2457)$ and Limits on Neutral D-meson Mixing
University of California, Santa Cruz

Worcester, Matthew ..... Search for Like-sign Dileptons in the CDF Run I Data
University of California Los Angeles

Yamazaki, Yuji ..... The ZEUS Experiment at HERA
KEK

Yang, Un-Ki ..... Unified Approach for Modeling Neutrino and Electron Nucleon Scattering Cross Sections
University of Chicago

Yu, Shin-Shan ..... Measurement of Λ_b Branching Ratios in Modes Containing a Λ_c
University of Pennsylvania

Zeng, Qinglin ..... Recent Results from BABAR on Charmonium Production in B Decays
Colorado State University

Zhu, Jun-Jie ..... Measurement of the W and Z Production Cross Sections at D0 using the Electron Decay Channels
University of Maryland

Zwaska, Robert ..... Status of the NuMI Project
University of Texas, Austin

Laboratory Posters

ANL ..... Wakefield Accelerator Drives Tomorrow's High Energy Physics Research
ATLAS Tile Calorimeter Support Structure

BNL ..... Very Long Baseline Neutrino Oscillation Experiments
Measuring $|V_{td}|$ with E949 at BNL
The U.S. is a Major Collaborator in ATLAS
RSVP (Rare Symmetry Violating Processes)
BNL AGS E821 – A Precision Measurement of the Anomalous Magnetic Moment of the Muon

CCLRC ..... Particle Physics Experiments Supported by CCLRC RAL
Accelerator R&D for Particle Physics within CCLRC

CEA DAPNIA ..... SPP: Service de Physique des Particules

CERN ..... A Laboratory for the World
Getting to the Heart of the Matter
Unlocking the Mysteries of the Universe
The World's Most Powerful Particle Accelerator

DESY ..... Global Networks
HERA at DESY
TESLA Linear Collider
XFEL with TESLA Technology

FNAL ..... Questions About the Cosmos
The Universe is Not Enough
To Make Sense of the Universe – from Quarks to the Cosmos

IHEP, Beijing ..... BEPC at BES
Programs at IHEP
BEPCII: The Major Upgrade Program of BEPC

KEK ..... KEKB and Belle
K2K and Next Generation Long Baseline Experiment
J-PARC High Intensity Proton Accelerator Facility
GLC Linear Collider for TeV Physics

LAL ..... LAL Participants
Scientific Goals
CTF3 and TESLA

LBNL ..... Neutrino Science at Berkeley Lab: Understanding Neutrino Oscillations
Reactor Neutrino Measurement of θ_{13}
Supernova/Acceleration Probe (SNAP)

LEPP, Cornell ..... Heavy Quark Spectroscopy
$|V_{cb}|$ and $|V_{ub}|$ from $B \to X\ell\nu$
CLEO-c, CESR-c and Accelerator Physics

LNF ..... Understanding Nature from Quarks to Stars
Where e^+e^- Colliders Were Born
Science, Technology, and Society

LNGS ..... Gran Sasso National Laboratories
Neutrino Physics
Dark Matter, Rare Events and More...

SLAC ..... B Factory PEP-II and BABAR
R&D for the Linear Collider and Detector
Particle Astrophysics

Contributed Papers

Electroweak Physics and Beyond

Alekhin, S.	hep-ph/0307219	The NNLO Predictions for the Rates of the W/Z Production in pp and $\bar{p}p$ Collisions
Akushevich, I.	hep-ph/0307333	Electroweak Radiative Effects in the Single W-Production at Tevatron and LHC
BELLE Collaboration		An Upper Bound on the Decay $\tau \to \mu\gamma$ from Belle
BELLE Collaboration		Search for the Lepton-Flavor-Violating Decay $\tau^- \to \mu^-\eta$ Decay at Belle
Bruneliere, R.	hep-ph/0201304	On Theoretical Uncertainties of the W Angular Distribution in W-Pair Production at LEP2 Energies
DELPHI Collaboration		Final Results from DELPHI on the Searches for SM and MSSM Neutral Higgs Bosons
DELPHI Collaboration		Measurement of Charged Triple Gauge Boson Couplings at DELPHI
DELPHI Collaboration		Study of W Boson Polarisations and Measurement of TGCs in the Reaction $e^+e^- \to W^+W^-$ at Energies between 189 and 208 GeV
DELPHI Collaboration		Measurement of the Mass and Width of the W Boson in e^+e^- Collisions at $\sqrt{s} \simeq$ 192-209 GeV
DELPHI Collaboration		Measurement of the W-pair Production Cross Section and W Branching Ratios in e^+e^- Collisions at $\sqrt{s}$ = 161-209 GeV
DELPHI Collaboration		Study of Tau-pair Production in Photon-Photon Collisions at LEP and Limits on the Anomalous Electromagnetic Moments of the Tau Lepton
DELPHI Collaboration		Single Intermediate Vector Boson Production in e^+e^- Collisions at $\sqrt{s}$ =183-209 GeV
DELPHI Collaboration		ZZ Production in e^+e^- Interactions
DELPHI Collaboration		Determination of A^b_{FB} using Inclusive Charge Reconstruction and Lifetime Tagging at the Z Pole
DELPHI Collaboration		Measurement of the Forward-Backward Asymmetries of $e^+e^- \to Z \to b\bar{b}$ and $e^+e^- \to Z \to c\bar{c}$ using Prompt Leptons
DELPHI Collaboration		Correlations between Particles from different W Bosons in $e^+e^- \to W^+W^-$ Events
DELPHI Collaboration		Measurement of the $e^+e^- \to W^+W^-\gamma$ Cross Section and Limits on Anomalous Quartic Gauge Coupling with DELPHI
DELPHI Collaboration		A Measurement of the Tau Hadronic Branching Ratios
DELPHI Collaboration		A Precise Measurement of the Tau Lifetime
DELPHI Collaboration		$Z\gamma^*$ Production in e^+e^- Interactions at $\sqrt{s}$ = 183 - 209 GeV in DELPHI
DELPHI Collaboration		Determination of the $e^+e^- \to \gamma\gamma(\gamma)$ Cross Section at LEP 2

DELPHI Collaboration ..... Update on the Investigation of Colour Reconnection in WW pairs using Particle Flow and mW Estimators

DELPHI Collaboration ..... Searches for Invisibly Decaying Higgs Bosons with the DELPHI Detector at LEP

DELPHI Collaboration ..... Searches for Neutral Higgs Bosons in Extended Models

DELPHI Collaboration ..... Search for Charged Higgs Bosons at LEP in General Two Higgs Doublet Models

DELPHI Collaboration ..... Complete DELPHI Data: Limits on Higgs Boson Masses and $tan\beta$ from a MSSM Parameter Scan

DELPHI Collaboration ..... Photon Events with Missing Energy at $\sqrt{s}$ =130 to 209 GeV

DELPHI Collaboration ..... Search for Single Top Production via FCNC with the DELPHI Detector at LEP at $\sqrt{s}$=189-208GeV

DELPHI Collaboration ..... Search for Fermiophobic Higgs at LEP2

DELPHI Collaboration ..... Flavour Independent Neutral Higgs Boson Searches with DELPHI at LEP-2

DELPHI Collaboration ..... DELPHI Results on Neutral Higgs Bosons in MSSM Benchmark Scenarios

DELPHI Collaboration ..... Search for Supersymmetric Particles with R-parity Violation in e^+e^- Collisions at $\sqrt{s}$ = 192 to 208 GeV

DELPHI Collaboration ..... Study of the Anomaly Mediated SUSY Breaking Model in DELPHI

DELPHI Collaboration ..... Search for a Fourth Generation b'-quark at LEP-II at $\sqrt{s}$=200-209 GeV

DELPHI Collaboration ..... Searches for Supersymmetric Particles in e^+e^- Collisions up to 208 GeV and Interpretation of the Results within the MSSM

H1 Collaboration ..... Search for Excited Neutrinos at HERA

H1 Collaboration ..... Isolated Electrons and Muons in Events with Missing Transverse Momentum at HERA

H1 Collaboration ..... Search for Excited Electrons at HERA

H1 Collaboration ..... Multi-Electron Production at High Transverse Momenta in ep Collisions at HERA

H1 Collaboration ..... Search for Single Top Production in ep Collisions at HERA

H1 Collaboration ..... Searches for Squark Production in R-Parity Violating Supersymmetry at HERA

H1 Collaboration ..... Muon Pair Production in ep Collisions at HERA

H1 Collaboration ..... Search for Doubly Charged Higgs Production at HERA

H1 Collaboration ..... A Search for Leptoquarks at HERA

H1 Collaboration ..... A Direct Search for Magnetic Monopoles at HERA

H1 Collaboration ..... General Search for New Phenomena in ep Scattering at HERA

H1 Collaboration ..... Search for Superlight Gravitinos at HERA

H1 Collaboration		Search for New Physics in $e^{\pm}q$ Contact Interactions at HERA
Jadach, S.	hep-ph/0209268	Electric Charge Screening Effect in Single W Production with the Koralw Monte Carlo

BELLE Collaboration	Measurement of the Branching Fraction for B$\to$ $\psi(2S)K^*(892)$ Decays
BELLE Collaboration	Measurement of CP-Violation Parameter $\sin 2\phi_1$ with 152 Million $B\overline{B}$ Pairs
BELLE Collaboration	Measurement of Branching Fraction Ratios and CP Asymmetries in $B^\pm \to D_{CP}K^\pm$
BELLE Collaboration	Observation of $B^\pm \to D_{CP}K^{*\pm}$ Decays
BELLE Collaboration	Observation of $B^+ \to \psi(3770)K^+$
BELLE Collaboration	A Study of Double $c\bar{c}$ Production in e^+e^- Annihilation at $\sqrt{s} \approx 10.6$ GeV
BELLE Collaboration	Measurement of the $e^+e^- \to D^{(*)+}D^{(*)-}$ Cross Sections

BELLE Collaboration ..... Observation of the $D^*_{sJ}(2317)$ and $D^*_{sJ}(2460)$ in B Decays

BELLE Collaboration ..... Study of $B^- \to D^{**0}\pi^-(D^{**0} \to D^{(*)+}\pi^-)$ Decays

BELLE Collaboration ..... Measurements of the D_{sJ} Resonance Properties

BELLE Collaboration ..... Measurement of the Ω_c^0 Mass and Observation of $\Omega_c^0 \to \Omega^-\ell^+\nu$

BELLE Collaboration ..... Observation of Radiative Decay $D^0 \to \phi\gamma$

BELLE Collaboration ..... Measurement of the D^0-$\bar{D}^0$ Lifetime Difference using $D^0 \to K\pi/KK$ Decays

BELLE Collaboration ..... Observation of a New Narrow Charmonium State in Exclusive $B^\pm \to K^\pm\pi^+\pi^- J/\psi$ Decays

BELLE Collaboration ..... Evidence for $B^+ \to \omega l^+\nu$

BELLE Collaboration ..... Studies of $B^0 \to \rho^\pm\pi^\mp$ and Evidence of $B^0 \to \rho^0\pi^0$

Cheng, Hai-Yang hep-ph/0212117 Hadronic Charmed Meson Decays Involving Scalar Mesons

CLEO Collaboration hep-ex/0306048 Dalitz Plot Analysis of D^0 to $\pi^+\pi^-\pi^0$ Decays in CLEO

CLEO Collaboration ..... Observation of the Hadronic Transitions $\chi_{b1,2}(2P) \to \omega$ Upsilon(1S)

CLEO Collaboration hep-ex/0212051 Measure of Lepton Momentum Moments, HQE parameters and $|V_{cb}|$

CLEO Collaboration hep-ex/0304015 Search for B Decay to $\bar{p}\ e\nu X$ using Partial Reconstruction

CLEO Collaboration hep-ex/0304019 Study of the q^2 Dependence of B to $\pi/\rho/\omega\ l\nu$ and V_{ub}

CLEO Collaboration ..... Measurement of Hadronic Recoil Mass Moments in Semileptonic B Decay

CLEO Collaboration hep-ex/0301028 Measure of Branching Fractions and Helicity Amplitudes in B to $D^*\rho$

CLEO Collaboration hep-ex/0306036 Measure of Form Factors and Search for CP Violation in Λ_c to $\Lambda e\nu$

CLEO Collaboration hep-ex/0305100 Observation of a Narrow Resonance at 2.46 GeV and Confirmation of the $D_sJ(2317)$

CLEO Collaboration hep-ex/0306060 Observation of $\eta_c{}'$ Production in Two-Photon Fusion at CLEO

DELPHI Collaboration ..... A Measurement of the Branching Fractions of the b-Quark into Charged and Neutral b-Hadrons

DELPHI Collaboration ..... A Precise Measurement of the B^+, B^0 and Mean b-Hadron Lifetime

DELPHI Collaboration ..... Measurement of $|V_{cb}|$ using the Semileptonic Decay $\bar{B}_d^0 \to D^{*+}l^-\ \bar{\nu}_l$

DELPHI Collaboration ..... Measurement of Moments of Inclusive Spectra in s.l. B Decays and Determination of OPE Non-Perturbative Parameters

DELPHI Collaboration ..... A Study of Excited b-Hadron States with the DELPHI Detector at LEP

DELPHI Collaboration ..... Inclusive J/ψ Production in Two-Photon Collisions at LEP II with the DELPHI Detector

DELPHI Collaboration ..... Measurement of the Open Beauty and Charm Production Cross Sections in $\gamma\gamma$ Collisions using Semileptonic Decays and Double Tagging at LEP2

DELPHI Collaboration ..... Search for η_b in Two-Photon Collisions with the DELPHI Detector

DELPHI Collaboration ..... The $\eta_c(2980)$ Formation in Two-Photon Collision at LEP Energies

Dubois-Felsmann, G. P. ..... Sensitivity of CKM Fits to Theoretical Uncertainties and their Representation

H1 Collaboration ..... Diffractive Photoproduction of Psi(2S) Mesons at HERA

H1 Collaboration ..... Inelastic Leptoproduction of J/ψ Mesons at HERA

H1 Collaboration ..... Inelastic Photoproduction of J/ψ Mesons at HERA

H1 Collaboration ..... Diffractive Photoproduction of J/ψ Mesons with Large Momentum Transfer at HERA

H1 Collaboration ..... Elastic Photoproduction of J/ψ Mesons

KLOE Collaboration hep-ex/0307016 KLOE Prospects and Preliminary Results for Kl3 Decay Measurements

Li, Hsiang-nan hep-ph/0210173 k_T Factorization of Exclusive B Decays

OPAL collaboration ..... Inclusive Analysis of the b-Quark Fragmentation Function in Z Decays at LEP

OPAL collaboration ..... A Study of Charm Quark Production in Beauty Quark Decays with the OPAL Detector at LEP

OPAL collaboration ..... A Measurement of Semileptonic B Decays to Narrow Orbitally-Excited Charm Mesons

OPAL collaboration ..... Charged Particle Multiplicities in Heavy and Light Quark Initiated Events above the Z^0 Peak

ZEUS Collaboration ..... Measurements of Inelastic J/ψ and ψ' Photoproduction at HERA

ZEUS Collaboration ..... Dijet Angular Distributions in Photoproduction of Charm at HERA

ZEUS Collaboration ..... Measurement of the Open Charm Contribution to the Diffractive Proton Structure Function

ZEUS Collaboration ..... Measurement of Proton-Dissociative Diffractive Photoproduction of J/ψ Mesons at HERA

ZEUS Collaboration ..... Measurement of Charm Fragmentation Ratios and Fractions in $\gamma - p$ Collisions at HERA

ZEUS Collaboration ..... Measurement of Inelastic J/ψ Production in Deep Inelastic Scattering at HERA

ZEUS Collaboration ..... Measurement of D^* Photoproduction for Events with a Leading Neutron at HERA

ZEUS Collaboration ..... Measurement of Inelastic J/ψ Helicity Distribution at HERA

ZEUS Collaboration ..... Measurement of Open Beauty Production in Deep Inelastic Scattering at HERA using a D^* plus Muon Tag

ZEUS Collaboration ..... Measurement of D^* Production in Deep Inelastic Scattering at HERA

$\gamma\gamma$ American Linear Collider Physics Group	hep-ph/0308103	Complementarity of a Low Energy Photon Collider and LHC Physics

List of Participants

1	Abe, Kazuo	KEK	Japan
2	Abramowicz, Halina	Tel Aviv University	Israel
3	Adams, Mark	University of Illinois, Chicago	USA
4	Aguilar-Benitez, Manuel	CIEMAT	Spain
5	Aihara, Hiroaki	University of Tokyo	Japan
6	Akchurin, Nural	Texas Tech University	USA
7	Albert, Justin	California Institute of Technology	USA
8	Albright, Carl	Northern Illinois University	USA
9	Albrow, Michael	Fermi National Accelerator Laboratory	USA
10	Alekhin, S. I.	IHEP, Serpukhov	Russia
11	Anderson, Kelby	University of Chicago	USA
12	Andrieu, Michel	The Ultimate Particle	France
13	Apollinari, Giorgio	Fermi National Accelerator Laboratory	USA
14	Appel, Jeff	Fermi National Accelerator Laboratory	USA
15	Armstrong, Stephen	CERN	CERN
16	Artuso, Marina	Syracuse University	USA
17	Aston, David	Stanford Linear Accelerator Center	USA
18	Atramentov, Oleksiy	Iowa State University	USA
19	Avery, Paul	University of Florida	USA
20	Avvakumov, Sergey	Stanford University	USA
21	Aymar, Robert	CERN	CERN
22	Ayres, David	Argonne National Laboratory	USA
23	Azzi, Patrizia	INFN, Padova	Italy
24	Bacci, Cesare	INFN, Roma II	Italy
25	Bachacou, Henri	Lawrence Berkeley National Laboratory	USA
26	Banerjee, Sudeshna	Tata Institute of Fundamental Research	India
27	Bargassa, Pedrame	Rice University	USA
28	Bauer, Dan	Fermi National Accelerator Laboratory	USA
29	Bedeschi, Franco	INFN, Pisa	Italy
30	Behnke, Ties	DESY, Hamburg	Germany
31	Bellagamba, Lorenzo	INFN, Bologna	Italy
32	Bellerive, Alain	Carleton University	Canada
33	Bellettini, Giorgio	INFN, Pisa	Italy
34	Benvenuti, Alberto	CERN	Italy
35	Beretvas, Andy	Fermi National Accelerator Laboratory	USA
36	Berger, Edmond	Argonne National Laboratory	USA
37	Bernardi, Gregorio	LPNHE-Paris	France
38	Bernstein, Robert	Fermi National Accelerator Laboratory	USA
39	Bertani, Monica	Laboratori Nazionali di Frascati	Italy
40	Bertolucci, Sergio	Laboratori Nazionali di Frascati	Italy
41	Bhat, Pushpa	Fermi National Accelerator Laboratory	USA
42	Bianco, Stefano	Laboratori Nazionali di Frascati	Italy
43	Bigi, Ikaros	University of Notre Dame	USA
44	Binkley, Morris	Fermi National Accelerator Laboratory	USA
45	Black, Kevin	Boston University	USA
46	Blaylock, Guy	University of Massachusetts	USA

47	Blazey, Jerry	Northern Illinois University	USA
48	Bloom, Elliott	Stanford Linear Accelerator Center	USA
49	Bloom, Ken	University of Michigan	USA
50	Bocian, Dariusz	INP Cracow	Poland
51	Bock, Greg	Fermi National Accelerator Laboratory	USA
52	Boehnlein, Amber	Fermi National Accelerator Laboratory	USA
53	Boisvert, Veronique	CERN	CERN
54	Bortoletto, Daniela	Purdue University	USA
55	Branson, James	University of California, San Diego	USA
56	Brau, James E.	University of Oregon	USA
57	Bromberg, Carl	Michigan State University	USA
58	Browder, Tom	University of Hawaii	USA
59	Brown, Chuck	Fermi National Accelerator Laboratory	USA
60	Brubaker, Erik	University of California, Berkeley	USA
61	Buchalla, Gerhard	LMU	Germany
62	Buchanan, Norm	Florida State University	USA
63	Buckley-Geer, Elizabeth	Fermi National Accelerator Laboratory	USA
64	Buehler, Marc	University of Illinois, Chicago	USA
65	Buescher, Volker	University of Freiburg	Germany
66	Buesser, Karsten	DESY, Hamburg	Germany
67	Bussey, Peter J.	Glasgow University	UK
68	Butler, Joel	Fermi National Accelerator Laboratory	USA
69	Calder, Neil	Stanford Linear Accelerator Center	USA
70	Canelli, Florencia	University of Rochester	USA
71	Casey, Brendan	Brown University	USA
72	Cashmore, Roger	CERN	CERN
